Mark your calendar now for the 30th Annual Meeting of the Eastern Neuroradiological Society (ENRS), August 23-26, 2018. This is a wonderful opportunity to bring family, join peers, learn and socialize at the luxurious Fairmont Southhampton Bermuda Resort, the site of America's Cup in 2017, located on the stunning Bermuda south shore with miles of pink sand beaches and its exclusive beach club resort.

For history buffs, forty years ago, Bermuda was the site of the 15th Annual Meeting of the American Society of Neuroradiology, March 27-31, 1977, hosted by one of the ASNR founding members, Dr. Norman E. Leeds, an honored guest, presenting the award in his name, The Norman E. Leeds award for the best Scientific Presentation.

The 2018 program maximizes learning from phenomenal speakers in our society with focused 20-minute block lectures, 4 SAMS and updates from rising junior faculty and scientific paper sessions. Each day is focused on topics in Brain, Head and Neck, Pediatrics, Spine and Neurointerventional, with Lunch & Learn Sessions. Competitive juices will be stimulated, by the challenging and enjoyable "Stump the Stars" Jeopardy Game Show!

The collegial, charming and relaxed atmosphere of Bermuda is a perfect opportunity to enjoy brilliance, brains and beaches, sharing knowledge and reconnecting with old friends and family and making new friends. The timing in August allows an enjoyable break prior to the Labor Day holiday and start of the school year. Bermuda is less than a two-hour flight from most eastern cities, and about a 55-minute plane ride from New York City. The Fairmont Southampton, is a beach paradise on nearly 100 acres, with spacious guestrooms many with private balconies and spectacular water views. There are unparalleled amenities from the kid's camp, resort pools, oceanfront beach club dive center, tennis courts, 18-hole golf course, and activities including deep sea fishing.

The ENRS is a favorite meeting of many, myself included, where all can learn, share knowledge and ideas in a friendly wonderful environment. I would like to take this opportunity to thank the many outstanding members of our Executive Committee who gave me invaluable advice and help, the many fabulous speakers and moderators who agreed to participate, our generous sponsors, Ken Cammarata from the ASNR, and Bethany Satter from ESI for their tireless efforts and priceless assistance.

All of us look forward to welcoming everyone to Bermuda for the ENRS 30th Annual Meeting. As Mark Twain once said, "You can go to heaven if you want. I'd rather stay in Bermuda."

Best Regards,

Claudia F.E. Kirsch, MD

Martin F. E. Kusch M. D

Vice President / President Elect and Program Chair

# Target Audience

The ENRS 30th Annual Meeting is targeted to both academic and private practice neuroradiologists, including trainees in the Northeast United States and Canada. Those with an interest in imaging and neurointervention in diseases of the brain, spinal cord, skull base and head and neck in both pediatric and adult patients. The meeting is equally targeted to physicians in training including both residents and fellows pursuing careers in radiology.

### Accreditation

Physicians: This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education through the joint providership of Educational Symposia and the Eastern Neuroradiological Society. Educational Symposia is accredited by the ACCME to provide continuing medical education for physicians.

Educational Symposia designates this live activity for a maximum of 26.0 AMA PRA Category 1 Credit(s)<sup>TM</sup>. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Self-Assessment Modules (SAMs): Educational Symposia has been granted Deemed Status by the American Board of Radiology (ABR). This allows Educational Symposia to develop and implement SAMs that satisfy ABR Part II MOC requirements.

# **Educational Objectives**

At the conclusion of the meeting, the participant should be able to:

- · Explain stroke imaging etiologies including hemorrhagic, embolic and vessel dissections, or stroke predictors from subarachnoid hemorrhage, and how MRI, perfusion imaging and arterial spin labeling are utilized in stroke assessment.
- Demonstrate improved knowledge regarding brain neoplasms and how perfusion, functional imaging and radiogenomics are utilized in pre-operative assessment of brain tumors.
- Differentiate and explain demyelination and radiographic mimics, CNS infections, and inflammatory neurologic conditions including IgG4, and the use of biomarkers in degenerative brain disease, and the utilization of conventional imaging techniques and newer imaging techniques.
- · Demonstrate greater awareness of pathology and imaging strategies for assessment of the anterior, middle and posterior skull base including the sella turcica and pituitary and cranial nerves.
- Discuss the important radiographic techniques and findings for disease of the orbit, temporal bone, sinonasal cavities, oral cavity and oropharynx, larynx, thoracic inlet, and salivary tissues, and important findings that need to be carefully assessed for such as perineural tumoral spread, lymphadenopathy, post-surgical flaps, and key findings that may be overlooked and missed.
- · Explain current and advanced imaging protocols for neonates and children of pathology associated with congenital abnormalities, phakomatosis, tumor, infection and trauma that may affect the orbit and temporal bone, CSF flow, including trauma and emerging techniques in imaging for traumatic brain injury.
- Explain the importance of gray matter versus white matter pathology in the spinal cord, and imaging of spinal neoplasms, trauma and post-operative critical radiographic findings, with note made to utilization of the proper nomenclature for disc disease.
- Describe the work-up and imaging findings for vertebroplasty, and optimizing vascular imaging of the spine and for vascular imaging in the treatment of aneurysm and new developments in intra-arterial chemotherapy.

No special educational preparation is required for this CME activity.

# **ENRS Abstract Submission:** Deadline for abstract submissions June 4, 2018

Abstracts will be accepted for oral presentation in 2 categories: (1) Scientific Oral Presentation or (2) Excerpta Extraordinaire (brief presentation of interesting, educational case reports). Submissions are welcome in all major categories in neuroradiology. Authors will be notified by mid-June. Authors of accepted abstracts will be required to register for the meeting and pay the meeting registration fee.

Interested candidates should submit abstract(s) accompanied by a completed abstract submission form electronically to: Doris D. M. Lin, M.D., Ph.D. at ddmlin@jhni.edu and to Chinthaka (Chris) Heyn, M.D., Ph.D., FRCPC at chris.heyn@utoronto.ca.

Visit http://www.edusymp.com/esi/2018/ENRS18/CallforAbstracts2018.pdf to access the submission form.

DISCLAIMER: Educational Symposia (ESI) and the Eastern Neuroradiological Society (ENRS) as planners and presenters of this meeting, and Professional Travel as the official travel agency for this meeting, claim no liability for the acts of any suppliers or the safety of any attendees while in transit to, from, or during, this event or any optional activities. The total amount of liability, if any, for the meeting organizers is limited to a refund of the registration fee, and Professional Travel's responsibility is limited to that of an agent.
